SAVE TIME, MONEY & LABOR... IT'S JUST THAT **e-z!**

FLAME FIGHTER

Flame Fighter, our patented fire tape, works for both wood and steel construction, using an easy mudless application, where tape is applied directly to clean drywall. E-Z tape has passed full scale tests for one-hour and two-hour rated, vertically or horizontally hung wall systems, using fire rated gypsum board. E-Z tape's fire tape has been rated for use in Fire Wall construction in US & Canada by Intertek Testing Services since 2002.

QUICK STICK

Quick Stick drywall tape is easily applied by simply moistening the tape to activate the adhesive... skip that first layer of mud! Mudless application will eliminate the pockets that appear when tape does not adhere to the mud, adding to your savings in both time and labor. E-Z tape has a center crease for quick and easy corner applications. **Quick Stick** adds to your savings and allows you to spread joint compound with no snagging... Making feathering a breeze.... **It's just that E-Z!**
