

E-Z STICK
DRYWALL FINISHING TAPE

NO MUD BASE REQUIRED!

The E-Z STICK Advantages

NO TOP release liner

E-Z STICK is made from one layer of paper.

SAVES installation time

E-Z STICK requires one less coat of joint compound compared to the traditional method.

CREASED for folding in corners

The crease down the center of the tape makes it easy to fold and install in corners. Fiberglass is not creased and is not even recommended for corners.

FEATHERS easy

The thinness of the E-Z STICK allows for easy spreading of joint compound. Taping tools won't snag on tape when spreading joint compound.

STRONGER material

E-Z STICK is stronger than Fiberglass.

BILINGUAL labels on each package

We have provided Spanish or French on one side and English on the other for the convenience of our customers.

DESCRIPTIVE packaging

Labels are very descriptive as to how to properly use the E-Z STICK.

INSTRUCTIONS with each package

Easy to use, tri-lingual instructions (English, Spanish, French) give the first time user greater confidence in their ability to be successful.

POINT OF PURCHASE Material

Point of purchase materials and product samples are available to all dealers to distribute to customers.

24/7 TECHNICAL ASSISTANCE

24 Hour "Hot Line" assistance is available by dialing 800-721-8273.
